Education

East Carolina University

August 2024 - Present

BS in Computer Science

- GPA: 3.5/4.0
- **Coursework:** Algorithmic Problem Solving, Discrete Mathematics, Algorithms and Data Structures, Object-Oriented Programming, Computer Networks, Operating Systems, Computer Graphics, Design and Analysis of Algorithms

Experience

Peer Academic Career Coach (PACC)

Greenville, NC

East Carolina University Computer Science Department

Jan 2026 - Present

- Acted as a mentor for an assigned group of 16 freshman computer science and software engineering students
- Provided resources for help with classes, navigating college life, building a network, and any other needs that mentees had

Leadership

Treasurer

Greenville, NC

Association for Computing Machinery ECU Chapter (ACM@ECU)

Aug 2025 - May 2026

- Oversaw budgeting and funding for events hosted by ACM@ECU in academic school year 2025-2026
- Developed a budget proposal and secured full funding from the Student Government Association to provide transportation for students to HackNC 2025
- Opened and managed ACM@ECU's first bank account, allowing for organization fundraising
- Assisted with budget and order management for the 2026 ECU Technology Summit

Coach

Greenville, NC

Coding Club ECU

Dec 2024 - May 2025

- Co-founded Coding Club ECU in collaboration with upperclassmen and faculty to provide students an introduction to competitive programming, with an emphasis on teamwork and collaboration
- Worked with peer leaders to organize East Carolina University's first in-house coding competition, providing 30 participants with hands-on competitive programming opportunities

Projects

Zak's Solar System

[github.com](#) [🔗](#)

- A 3D model of the solar system, consisting of all planets and their major moons at a relative approximation of their real orbital and rotational speeds
- Learned how to use the Three.js library in order to implement 3D graphics
- Used HTML and CSS to implement custom and interactive UI elements that provide information and ease of use to the user

Dig Site Delta-42

[linkedin.com](#) [🔗](#)

- Used Unreal Engine 5 to learn about the process of level design, development, and iteration
- Engaged in playtests with peers and industry professionals in order to properly change and make improvements to the level
- Project can be downloaded [here](#) [🔗](#)

Technologies

Languages: C++, C, Python, Java, Javascript, HTML, CSS

Tools: Unreal Engine 5, Git, Raylib, Three.js
